Vitalwasser - Minerals for organism

Weight: 600 g

Contains dissolved minerals in ion form. Helps the body to optimally handle with minerals, balance minerals loss and thanks to the valuable minerals content it provides a feeling of good health.

Nutrition supplement "vital water" contains dissolved minerals in ion form. For many decades the scientists have been searching for the reasons behind longevity of Hunza ethnic group who rank to the groups of highest average length of life in the world, living in inaccessible villages in Himalaya mountains. They drink milky water from the glacier considering it the elixir of youth. The Hunzas do not suffer from cancer nor other degenerative diseases. The scientists also investigated that their diet and drinking water contains huge amount of minerals. This water similar to pure distilled water at the beginning, later on its way through glacier gets enriched by colloid minerals full of energy. Physical properties of this water substantially differ from our drinking water. Due to a low surface strength, this water better captures nutrition substances (minerals and trace elements) and transports them to the cells while removing harmful substances. In a colloid form, the body can best absorb minerals and trace elements.

Recommended dosage:

For preparing a "vital water", dissolve 1 tablespoon (cca 10 g) of powder in 1 liter of tap water and mix well. The drink is similar to a natural mineral water while containing colloid minerals of 98% absorbability. One piece of the product provides 60 liters of vital water.

IMMUNE SYSTEM IMPROVEMENT

OPC Bio Complex - Miraculous antioxidant

Content: 27 g / 60 capsules

OPC is the most powerful out of all known antioxidants. OPC acts as a relief to the vessels, spreads them and reduces blood pressure. The product multiplies the effect of vitamin C, attenuates inflammation, improves blood circulation and promotes physical mobility thank to its ability to bind colagene.

Our body is a self-healing system. The reason for majority of diseases is deficit of life important substances which can not be produced by a body itself but have to be intaken them in the food. Vitamin C and its co-factor OPC ranks to them. Should a body have all these substances available all the time, it is capable not only to self-heal, but also to maintain health and vitality. Combination of vitamin C and OPC is a real elixir of youth for our body.

OPC is an abbreviation for "Oligomeric ProanthoCyanidine". It is a natural substance present in many plants, mostly in shell, cores or in stone, it means in the parts we throw away. Therefore despite our eating the fruits with OPC content, we suffer from OPC deficit. OPC is the most powerful out of all currently known antioxidants, 18 times stronger than vitamin C and 40 times stronger thn vitamin E.

The discovery of OPC effect could mean a significantly longer life in good health. By a higher OPC content, our blood has much less fibrinogen, a protein that promotes clotting, because the OPC dissolves precipitates. Moreover, it has a relieving effect to vessels expanding them thus reducing the blood pressure. In women, OPC stimulates an increased estrogen production.

As for vitamin C, your body however can not self-produce OPC, therefore its regular intake is necessary. OPC can not be substituted by vitamin C, both strengthen mutual effect. Recommended daily dosage is 50 to 100 mg, this dosage can be doubled. OPC is absorbed over several minutes into the oral mucosa and a few minutes later it is already present in the blood. As OPC has small molecules, same as vitamin C, it can penetrate over the obstacles other substances can not get through, being therefore effective to blood, brain and medulla. As early as 24 hours after an OPC intake, the vessels' resistance increases significantly. It is extremely important that along with vitamin C, OPC always brings effect to all from the age of 18 up to 80.

Usage of OPC Bio Complex: Use OPC Bio Complex always before breakfast with 1/4 liter of water. Ideal is combination with the product Royal Plus due to its high content of vitamin C providing an important synergy effect.

As a prevention, 1-2 capsules daily are sufficient. Higher dosage (e.g. 3-4 capsules daily) is appropriate for those who suffer from allergies, chronic inflammations, varicose veins, vascular diseases, etc.

Keep in cool dry spot in a well closed package.
